SARAN RAJ SARAVANAN

Full Stack Developer | Python, FastAPI | Java, Spring Boot | React.js, Angular
Dindigul, India | ssaranraj15102021@gmail.com | +91 75488 62252 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of experience across Python (FastAPI, automation scripting) and Java (Spring Boot, React.js, Angular), building REST APIs and full-stack web applications. Strong foundation in incident management and Root Cause Analysis, with proven results improving system reliability and reducing manual triage effort. Experienced in cloud deployment on AWS and Azure. Eager to contribute technical expertise to a collaborative, growth-oriented team.

CORE SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript

Backend: FastAPI, REST APIs, Spring Boot, Spring Security, Microservices

Frontend: React.js, Angular, HTML5, CSS3, SCSS

Databases: MySQL, SQLAlchemy

Cloud Platforms: AWS, Azure

Tools & Practices: Git, Kibana, GitHub Copilot, Incident Management, Root Cause Analysis, Automation, Agile

PROFESSIONAL EXPERIENCE

Analyst | Fortune 500 US-based Multinational Telecommunications & Media Conglomerate

Capgemini, Chennai, India — July 2024 – April 2026

- Resolved 10+ production incidents monthly through detailed Root Cause Analysis, improving system uptime and reducing recurring issues in an enterprise Agile environment.
- Developed Python automation scripts and a FastAPI-based issue identification feature, streamlining SOPs and monitoring/debugging workflows, cutting manual effort by 70% and accelerating resolution time.
- Designed cross-domain triage rules based on historical incident patterns, enabling initial issue detection before ticket creation and reducing team triage effort by 70%.
- Automated root-cause investigation and ticket creation using Kibana, GitHub Copilot, and AI tools, cutting manual triage by 50% and resolution time by 80%.

PROJECTS

Inventory Management App | Python, FastAPI, SQLAlchemy, MySQL, React | GitHub

- Built a full-stack inventory management system using FastAPI and SQLAlchemy with a MySQL backend, implementing role-based accounts (Admin/Manager) and activity logging for every create, update, and delete action.
- Designed REST endpoints for authentication, inventory CRUD, and activity tracking, integrated with a React 19 + Axios frontend featuring a responsive dashboard, light/dark theme, and real-time inventory updates.

Event Booking System | Spring Boot, Spring Security, MySQL, React, JWT | Backend | Frontend

- Built a full-stack event booking platform using Spring Boot 3, Spring Security, and MySQL, implementing JWT-based authentication and role-based access control to secure User/Admin workflows.
- Developed REST endpoints across auth, listings, bookings, and admin modules, integrated with a React 19 + Vite frontend via Axios, enabling event discovery, calendar view, and admin CRUD operations.

CERTIFICATIONS & TRAINING

- Microsoft Azure AI Fundamentals (AI-900)
- GitHub Copilot Training

EDUCATION

Master of Business Administration (M.B.A.) – Systems Management

Bharathidasan University, India | 2023–2026

Bachelor of Engineering (B.E.) – Civil Engineering

Mepco Schlenk Engineering College, India | 2019–2023
